

### Tradeshow 100% Design London 2017 Impressions

## Essence of Strength

---

Created by the British industrial designer, Kristian Arens, the debut collection of "Essence of Strength" comprises a Chaise Longue, a range of carbon Aero Benches and the Cobra High Stool. The products contrast novel carbon fibre technologies with hand crafted leather and wood additions. The furniture has been manufactured using a mix of highly skilled composites experts and artisan craftsmen for the custom finishes. The stunning, contemporary furniture uses natural curves to deliver inherent strength while the advanced composite materials enable cantilevered forms that defy normal design parameters to support varying human postures.

The designs are a true engineering accomplishment, delivering simplistic, luxurious elegance.
